

# ***PBI2212 Battery Booster***

The best and simplest way to get flat batteries back to life, or to give them a much needed charge, is to use the Schumacher PBI2212 battery booster

# PBI2212 Battery Booster

Tough and portable on-demand charging

## Schumacher: peak performance since 1947

Since 1947, Schumacher Electric Corporation has been leading change and driving performance to exceed its customer's expectations. Engineered patent pending technologies mean Schumacher is the brand of choice, when it comes to battery related products.

## Only the best battery counts

It is generally accepted that the best battery for use in a booster pack is the Hawker EnerSys battery; its power output and longevity make it ideal for the strenuous task of starting a dead vehicle battery.

Typically a Hawker EnerSys battery can be charged and discharged over 2,000 times compared to less than 1,000 times with cheaper alternatives. A booster fitted with this type of battery will last longer and give greater performance making it much more cost effective over time.

The Schumacher PBI2212 battery booster is fitted with a Hawker EnerSys battery.

## Every little detail considered

To ensure that safety, ease of use and performance are unrivalled on the PBI2212, every consideration was taken in the design of the unit. From simple features such as an easy to access on/off switch and reverse polarity alarm to protect both the vehicle and operator, through to the addition of the best possible cables.

Longer cables allow the unit to be kept on the floor when being used, resulting in the user not having to balance the booster pack inside the vehicle or on top of the engine.

Schumacher cables are made of 99.9% pure copper and have 2,500 strands, giving greater capacity for boosting.

## Simple Operation

Easy to use, the Schumacher PBI2212 needs no special training; it can be used straight out of the box and will soon become a valuable and trusted piece of equipment in the workshop.

# PBI2212 Battery Booster

As with all things in life, you get what you pay for

## PBI2212 Highlights

- 510 amps at 5 seconds jump starting output
- 1900 peak amps
- 185 cold cranking amps
- High performance Hawker AGM Battery
- Isolating on/off switch
- Audible alarm signal, reverse polarity, over voltage (to protect 12v versions) connection reminder
- Two function digital display indicates internal and vehicles' battery voltage and % of charge when charging internal batteries also indicates charging systems voltage while engine running
- External 2 amp automatic charger for fast safe charging and maintenance
- Extra long and flexible 1.3m cables fitted with heavy duty replaceable clamps
- Auxiliary power output
- Easy wrap cable storages with clamp pockets
- Rubber boot to protect storage from knocks and bangs

## technical summary

Part Number	02390-0002
Height	38cm
Weight	9.74kg
Internal Battery Type	High performance Hawker AGM Battery
Output Voltage	12v DC/6 cells
Cranking Amps	225 Amps
Cold Cranking Amps	185 Amps
Peak Starting Amps	1100 Amps
Jump Starting Output	388Amps@5 seconds
Clamps	Heavy duty replaceable
Booster Cables	1.3m
