

# Autoclimate Bumpers

Always looking to give the best quality

## 5 reasons why you should buy from our Bumper Range:

### 1. Genuine OE parts

Autoclimate offer a selection of OE bumpers, including the full available range of the Fiat and Alfa brands.

The recently expanded OE bumper range now includes makes from the Audi, Vauxhall, Chevrolet, Mercedes-Benz and Jeep range. Autoclimate clearly state the quality of the supplied part.

If a supplied bumper is non-OE it will always be third-party accredited, which ensures matching quality to the OE equivalent.

### 2. High quality Production

The OE bumpers supplied by Autoclimate are exactly the same bumpers which are fitted onto new vehicles on the production line. They are produced using the exact same equipment as manufacturers of OE bumpers, using the optimal number and position of injection points to ensure an identical match.

Materials used are quality compliant to the OE specifications and are safety tested to the highest possible standard, whilst being delivered in packaging similar to that used by dealers, helping to protect the bumper from damage.

### 3. Careful Steps

It is vitally important to Autoclimate that its customers are using PAS125 compliant parts, a key factor for many accident repair centres. Using OE parts will help with PAS125 compliance.

Each and every supplier of bumpers to Autoclimate must be ISO 9001 accredited (as Autoclimate are) this gives us the guarantee that they have self-monitoring mechanisms and strive to produce a quality product repeatedly.

*“Fit first time with an OE bumper saving you time and reducing key-to-key time”*

#### 4. Easy to fit

An OE bumper will fit to a vehicle first time, with minimal labour involvement. This means less time to fix the vehicle overall, making the job more profitable for you and increasing the customer satisfaction with the work carried out.

#### 5. Unrivalled Customer Service

Each region of the UK is given a dedicated Customer Services Advisor who will handle your enquiry. By letting the advisor know what part you require, and the registration number of the

vehicle, they will use direct links to live DVLA data and SMMT data to identify the correct part - Autoclimate achieves over 99% correct first time identification on all parts.
